

**Quick setup** — if you've done this kind of thing before

 Set up in Desktop

 or 

HTTP

SSH

git@github.com:wbtxd2004/Blast\_database.git

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

Create a new repository on the command line

```
touch README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin git@github.com:wbtxd2004/Blast_database.git
git push -u origin master
```

Push an existing repository from the command line

```
git remote add origin git@github.com:wbtxd2004/Blast_database.git
git push -u origin master
```

Import code from an old repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.
